

SURGERY CASE SUMMARY: 240902364808

Patient Mr. Nagaraj reported with pain and mobility of teeth in lower front tooth region. On CBCT evaluation, Vertical root fracture was noted in 31 and 41. On clinical examination multiple draining sinuses were noted. Periapical surgery was planned for the debridement of granulation tissue. Extraction of 31 and 41 was performed intraoperatively. Single interrupted sutures were given. Patient recalled for follow up.
